Pooginook
Merino and
Poll Stud

Welcome to the 2018 Pooginook Merino and Poll Ram Sale

“Join our genetic express for total productivity”

We are delighted to be able to provide the second drop of sale rams from the DNA pedigree program we began in 2016. All Auction and flock rams will be presented this year with ASBV data to assist with your ram selections.

Pooginook continues to class the rams using a balance of visual assessment, raw data and breeding values generated by Sheep Genetics. These breeding values are based on information collected on growth, wool cut, micron and carcase traits. We are pleased with the progress achieved and welcome feedback about the sheep.

In 2016 Pooginook DNA sampled 4,000 Stud ewes and their progeny in

2017. This is increasing the accuracy of the Australian Sheep Breeding Values (ASBVs) for our sheep. Carcase traits have been measured at 12 months for the sale rams this year and expressed as an ASBV. The Merino Select Index displayed in the catalogue is Merino Production plus (MP+), providing a balance between slightly reducing fibre diameter, increasing fleece weight and increasing growth at 12 months.

I hope you have a successful day at the sale and welcome you to be part of the Pooginook vision for Merino breeding.

Pooginook Manager, 2018

Pooginook's Goal

To provide advanced Merino genetics that result in profitable Merino flocks for our clients.

Auction Registration

All prospective buyers must register by 11am on the sale day. Outside agents are welcome and must register prospective buyers by 11am on the sale day to gain a rebate.

Delivery

Sheep sold on the day must be taken from Pooginook by Tuesday 2 October 2018. All care will be taken of the rams, however responsibility for loss or injury will be borne by the vendor from the fall of the hammer. We recommend Livestock Insurance for all rams.

Fibre Diameter Analysis

Riverina Wool Testers, using CSIRO Laser Scan, tested the rams on 16 August 2018. The rams had 6.0 months wool growth at the time. This information should be used only as a guide. Paraway Pastoral Company Limited accepts no responsibility for the accuracy.

Health Status

Pooginook is a Brucellosis Accredited Free Flock and has Nationally Accredited Johnes Disease Market Assurance Status MN3.

The Pooginook Stud Flock has Owner-declared footrot free status.

Auction Selling Agent

Landmark Mills Finley and Elders. Pooginook rams are sold exclusive of GST.

Pooginook Semen Marketing Policy

All Pooginook rams purchased are sold under the condition that 100% of the semen marketing rights are retained by Paraway Pastoral Company Limited.

If you purchase a Pooginook Ram:

1. The purchaser/s must be nominated at the point of sale.
2. You can use semen by the ram for your own flock requirements.
3. Under this selling agreement you are not permitted to market semen from the ram.
4. Semen marketing rights can be negotiated with Paraway Pastoral Company Limited.
5. If the ram is re-sold the purchaser must be made aware that the semen marketing rights are retained by Paraway Pastoral Company Limited.

Australian Sheep Breeding Values for the Pooginook 2017 drop rams

Pooginook has been benchmarking itself across the industry through entry of sires into sire evaluations and the Sheep CRC Information Nucleus flock. This has put the Pooginook flock in the position to have 'across' flock ASBVs for our sale rams. This year we are offering across flock ASBVs that will assist you with your ram selections.

Index

In 2015 Sheep Genetics revised the MERINOSELECT Merino Production Plus index (MP+). The relevant weights are:

PWWT	Post Weaning Weight. Animals with a positive figure will produce lambs that grow faster up to 200 days.
YWT	Yearling Bodyweight. Animals with a positive figure will produce lambs that grow faster. Data is in kilograms.
YFAT	Describes the fat depth at a consistent weight at 12 months (measured in millimeters).
YEMD	Describes the genes for muscle depth at a constant weight at 12 months (measured in millimeters)
YFD	Yearling Fibre Diameter. A negative figure in fibre diameter measured as a yearling at 300 days means the ram is carrying the genes to reduce fibre diameter at yearling age in its progeny. Data shows difference in micron.
YCFW	Yearling Clean Fleece Weight. A ram with a positive figure is more likely to produce progeny with a higher fleece weight. Data shows difference in percentage of clean fleece weight.
Index	MP+ is a guide with high emphasis on growth, fleece weight and number of lambs weaned. Moderate emphasis is also placed on CV, FD and SS.

Tips for Production of Commercial Merinos

- Shear rams twice per year and keep rams in Score 3-4. Ensure ewes are Score 3-4 at mating and on a rising plane of nutrition
- Check rams physical soundness
- 2.00% mature rams only joined to maiden ewes
- Join rams @ 1.25% to 1.50% to mature ewes
- Join for 6 weeks only and use wether teasers
- Scan 6 weeks after rams are out for single, multiple and dry ewes

Eight Weeks Prior to Joining

- Feed 400-500gms of lupins a day
