

POOGINOOK 2015 RAM SALE

240 Rams - On Property
12.30pm Tuesday 29 September 2015

Pooginook
Merino and
Poll Stud

Pooginook's Goal

We aim to provide advanced Merino genetics that result in profitable Merino flocks for our clients.

Auction Registration

All prospective buyers must register by 11am on the sale day. Outside agents are welcome and must register prospective buyers by 11am on the sale day to gain a rebate.

Delivery

Sheep sold on the day must be taken from Pooginook by Tuesday 6 October 2015. All care will be taken of the rams however responsibility for loss or injury will be borne by the vendor from the fall of the hammer. We recommend Livestock Insurance for all rams.

Fibre Diameter Analysis

Riverina Wool Testers using CSIRO Laser Scan tested the rams on 20 August 2015. The rams had 4.0 months wool growth at the time. This information should be used only as a guide. Paraway Pastoral Company Limited accepts no responsibility for the accuracy.

Health Status

Pooginook is Brucellosis Accredited Free Flock and has Nationally Accredited Johnes Disease Market Assurance Status MN3.

The Pooginook Stud Flock has Owner declared footrot free status.

Auction Selling Agent

Landmark Mills Finley and Elders. Pooginook rams are sold exclusive of GST.

Pooginook Semen Marketing Policy

All Pooginook Merino rams purchased are sold under the condition that 100% of the semen marketing rights are retained by Paraway Pastoral Company Limited.

If you purchase a Pooginook Ram:

1. The purchaser/s must be nominated at the point of sale.
2. You can use semen by the ram for your own flock requirements.
3. Under this selling agreement you are not permitted to market semen from the ram.
4. Semen marketing rights can be negotiated with Paraway Pastoral Company Limited.
5. If the ram is re-sold the purchaser must be made aware that the semen marketing rights are retained by Paraway Pastoral Company Limited.

Welcome to the 2015 Pooginook Merino and Poll Ram Sale

*“It is our aim to make your flock
the most profitable in your district”*

John Sutherland 2015

We are pleased with this year's rams as they are showing the early growth and productive plain skins that we have been selecting for over recent years. Exceptional wool cut continues to underpin the rams with average wool cut of the sale rams in the top 15% of the Sheep Genetics data base.

Pooginook classer, David Taylor continues to class the rams using a balance of visual assessment, raw data and breeding values generated by Sheep Genetics. These breeding values are based on information collected on growth, wool cut, micron and carcase traits. We are pleased with the progress achieved and welcome feedback about the sheep.

Pooginook has continued to increase the pedigree recording of all specially bred and some syndicate bred rams. This is increasing the accuracy of the Australian Sheep Breeding Values (ASBVs). Carcase traits have been measured at 200 days for the sale rams this year. The Merino Select Index displayed in the catalogue is Merino Production plus (MP+), providing a balance between slightly reducing fibre diameter, increasing fleece weight and increasing growth at 12 months.

I hope you have a successful day at the sale and welcome you to be part of the Pooginook vision for Merino breeding.

John Sutherland
Pooginook Manager

Thanks to David Taylor for the photography in this catalogue.

Average of Lot 1 to 250

FD	CV	SD	CF	BWT	EMD	FAT
19.5	18	3.3	98.8	78.1	21.4	1.54

- Rams born mid May/June 2014
- Wool mid side tested 22 August 2015
- Shorn and fleece weighed 29 April 2015
- Bodyweight taken on 31 August 2015

Measured Performance Data

Sire	Sire of ram (See sire reference)
FD	Fibre diameter (Laser scan micron test)
CV	Coefficient of variation of fibre diameter
SD	Standard deviation of fibre diameter
CF	Comfort factor (No. of fibres under 30 micron)
BWT	Bodyweight in kilograms measured 31 August 2015
EMD	Eye Muscle Depth measured in millimeters 28 January 2015
Fat	Fat depth measured in millimeters 28 January 2015

Australian Sheep Breeding Values for the Pooginook 2013 drop rams

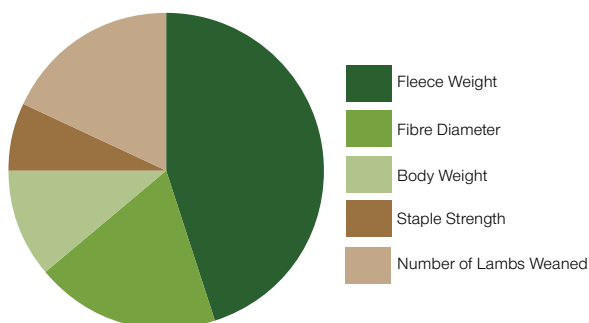

Pooginook has been benchmarking itself across the industry through entry of sires into sire evaluations and the Sheep CRC Information Nucleus flock. This has put the Pooginook flock in the position to have 'across' flock ASBVs for our sale rams. This year we are offering across flock ASBVs that will assist you with your ram selections.

-0.9	-0.4	18.3	4.1	149

Index

In 2015 Sheep Genetics revised the MERINOSELECT Merino Production Plus index (MP+). The relevant weights are:

YFD	Yearling Fibre Diameter. A negative figure in fibre diameter measured as a yearling at 300 days means the ram is carrying the genes to reduce fibre diameter at yearling age in its progeny. Data shows difference in micron.
YFDCV	Yearling Coefficient of Variation is taken when microns are measured as a yearling at 300 days. Data shows difference in percentage of CV.
YCFW	Yearling Clean Fleece Weight. A ram with a positive figure is more likely to produce progeny with a higher fleece weight. Data shows difference in percentage of clean fleece weight.
YWT	Yearling Bodyweight. Animals with a positive figure will produce lambs that grow faster. Data is in kilograms.
Index	MP+ is a guide with high emphasis on growth, fleece weight and number of lambs weaned. Moderate emphasis is also placed on CV, FD and SS.

Tips for Production of Commercial Merinos

- Shear rams twice per year and keep rams in Score 3-4. Ensure ewes are Score 3-4 at mating and on a rising plane of nutrition
- Check rams physical soundness
- 2.00% mature rams only joined to maiden ewes
- Join rams @ 1.25% to 1.50% to mature ewes
- Join for 6 weeks only and use wether teasers
- Scan 6 weeks after rams are out for single, multiple and dry ewes
- Ensure single lambers remain in Score 3 condition and ensure twin lambers graze the best pasture and Score 3-4 condition
- Maiden ewes require extra nutrition to achieve good production
- Bait foxes prior to and during lambing and use Alpacas as guardians
- 2 weeks prior to lambing separate twin bearing ewes into mobs less than 200 and single bearing ewes into mobs less than 500
- Twin ewes perform best with multiple watering points, good shelter and best available pasture
- Separate wet ewes from dry ewes at marking
- Wean lambs when the oldest lamb is 12 to 14 weeks
- 6:1 vaccinate for 2nd time and drench onto fresh pasture and periodic worm resistance test
- Use Alpacas in weaner lambs
- Body weigh weaners and monitor over summer months. Don't forget to monitor worm burden
- Ensure weaners achieve targeted body weights up to 12 months
- As a guide maintain weaners at Score 3 and aim for 50kg at 12 months

Tips for Production of Commercial Merinos

Ram Care Guide

Your rams are an investment in advanced sheep and wool production.

General Care of Rams

- Run in a paddock with other Merino rams with good pasture. PGK rams are Accredited Brucellosis free and National Accredited Johnes Disease Market
- Assurance Status MN3 avoid running them with Prime Lamb sires
- Shear rams twice a year
- Apply fly preventative chemical around horns prior to joining
- Drench to a program. We recommend worm testing before drenching
- Graze in a well watered, well sheltered, good paddock all year around
- We recommend an annual vaccination of 6:1

Eight Weeks Prior to Joining

- Feed 400-500gms of lupins a day
- Shear rams 8-10 weeks prior to joining
- We recommend the use of teasers if joining October to December
- Check for testicle abnormalities and size

After Joining

- If necessary supplement feed and put rams in a good paddock to regain condition
- Maintain sires at Score 3
- Class rams annually and check for soundness
